

FIA Motorsport Games 2019 – Environmental Policy

The FIA is taking action to promote the adoption of environmental best practice across motor sport. As part of this global initiative, the FIA is committed to align the environmental performance of the newly created FIA Motorsport Games, taking place in 2019 at the Vallelunga Circuit in Italy, to the requirements of the “Two-Star” level of the FIA Environmental Accreditation Programme, which comprises three levels. This will be achieved under the supervision of a dedicated Environmental Officer who will work closely with the event’s promoter, the circuit team and relevant members of the Motorsport Games organization committee.

In line with this commitment, the FIA will ensure:

- ✓ That the FIA Motorsport Games follow all relevant local, regional and national environmental laws and regulations;
- ✓ That all major stakeholders and partners are involved and engaged in the process, including during the preparation phase;
- ✓ That the inaugural FIA Motorsport Games serve as a baseline event that will set the path for continual improvement in the following years;
- ✓ That the FIA Motorsport Games become an example to follow in terms of environmental management.

The implementation of the 2019 FIA Motorsport Games Environmental Policy is linked to a number of specific and measurable **Objectives and Targets** that will be evaluated in the post-2019 event phase and reviewed in the 2020 event preparation phase. Notably, the FIA will:

- ✓ Develop a system to record various data from the 2019 event, which will serve as a basis to measure improvement at the 2020 event and identify areas of improvement;
- ✓ Raise awareness and communicate about the environmental initiative with relevant internal and external audiences;
- ✓ Encourage the Vallelunga Circuit and the Italian ASN (ACI) to engage in the FIA Environmental Accreditation Programme;
- ✓ Commit to reach the Three-Star accreditation level at the 2020 event.

To foster collective commitment and promote continual progress, this Environmental Policy and its related Objectives and Targets, in place for the 2019 FIA Motorsport Games, will be revised on a yearly basis. They will be endorsed by the FIA Motorsport Games management and communicated to all relevant partners and stakeholders.

Frédéric Bertrand
FIA Circuit Championships Director
